AIR POWERED WASTE PRESSES MODEL X-PRESS

**Unique, Flexible and Easy
to use Waste Presses for**

- General Waste
- Kitchen Waste
- Hazardous Waste
- Offshore Waste

ECDrive
low energy

ENVIRONMENTAL CONCERN WITH COMMON SENSE

KEY FEATURES

Compact general and food waste and improve the waste area. More space, less mess, better hygiene and the solution to overflowing bins.

Reduce number of bins and collections by 80%, reduce costs and improve internal logistics and productivity by locating baler close to the waste source.

Models 300 and 400 are available with wheels making it easy to move the waste to the bin area. Being mobile also makes cleaning much easier.

Alternatively models 300 and 400 can be fastened to the floor, perfect for uneven ground and offshore environments.

Compaction ratio of up to 10:1 can be achieved.

Easy to empty and transport to container for collection.

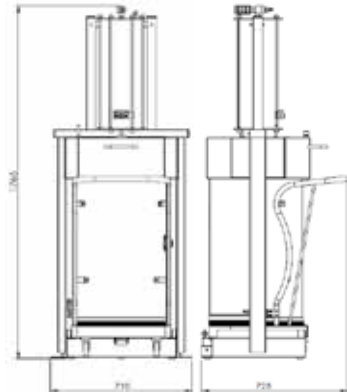

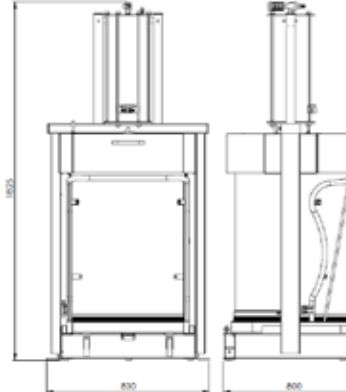

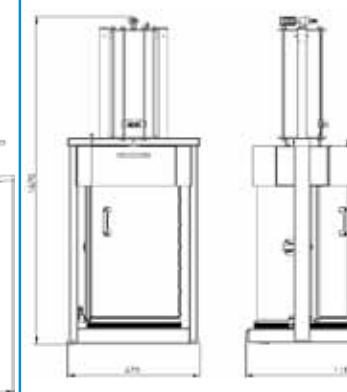

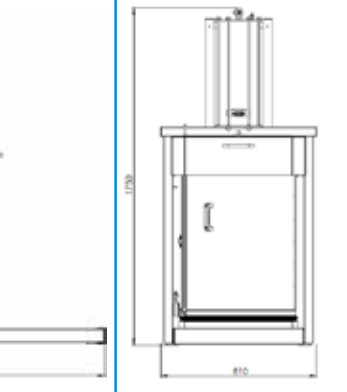

Lift trolley (fig. 1) provided for safe lifting.

SOLUTIONS

GENERAL WASTE

The **Mil-tek** X-Press range of Waste Presses can compact general waste into manageable plastic bags. The volume reduction achieved by compacting the waste is at a ratio of up to 10:1. The X-Press range can either be located close to the source of waste or in a designated area where the bags can be placed directly into bins/skips.

KITCHEN WASTE

The X-Press machines provide a hygienic and cost effective solution for kitchen waste. Being air powered, the waste press can be placed in areas where food is prepared as there is no risk of hazardous oil spillages. Black bag waste can be placed directly into the X-Press wagon, keeping fluids and smells inside the machine, improving tidiness and hygiene.

HAZARDOUS WASTE

Hazardous waste can be compacted directly into the X-Press wagon, or the X-Press machine can be adapted to fit a standard hazardous waste drum. By compacting the hazardous waste, expensive collections and lift frequency can be reduced saving up to 80% on current costs.

PUBLIC SECTOR

Schools, Hospitals, Prisons, Local Authority, MOD.....

The Air Powered X-Press Range can be used in a variety of locations. Ideal for kitchens, food preparation sites, offices, and general waste areas, the X-Press range operate with both low noise and low energy consumption.

General black bag waste, including food and fluids can be compacted, reducing spiralling waste costs and saving space and valuable staff time.

Complete with Lift Trolley (Fig.1) for safe handling, the **Mil-tek** X-Press range is the perfect solution for the Public Sector.
