

Restore

HARD SURFACE RESTORATION

Heavy Duty Deep Restoration for Tiles and Hard Surfaces

Turn back the clock on years of soil and detergent residue build-up with powerful cleaning technology that restores the original look and performance of hard surfaces and flooring, especially tiles.

Grime, mineral scale, grout smear, efflorescence, soap scum and embedded stains are no match for this heavy duty cleaner that will instantly give new life to tired and worn areas.

UNIQUE FORMULATION

- Powerful cleaning action
- Restores surfaces to their original look and non-slip performance
- Safe on all man-made tiles and non-ferrous metals
- Effective grout restorer
- Low PH
- No chemical residue

Restore

HARD SURFACE RESTORATION

Heavy Duty Formulation

Restore's powerful cleaning agents penetrate deeply to remove surface residue build-up and embedded stains.

The unique low pH formula contains no hydrochloric, hydrofluoric, phosphoric or sulphamic acids which makes the product safer and gentler to use, without compromising on cleaning power.

Restores Tiles & Grout

Remove layers of residue and build up on tiled surfaces, including heavy duty areas like washrooms, showers and pool surrounds.

Overcome stubborn grout stains, embedded soils and cement and grout smear. Use Restore to prepare grout ahead of applying grout sealer.

Suitable for a Range of Surfaces

Restore is safe to use on all man-made tiles such as porcelain and ceramic, as well as non-ferrous metals such as Aluminum. Use with care on sandstone, quarry tiles, terracotta and slate.

This product is not suitable for use on acid sensitive surfaces including marble, limestone, granite and other natural stone and we recommend to always pre-test on every surface before use.

ActiveEco Cleaning System

Restore is a deep cleaning agent designed for periodic use on heavily soiled and worn out surfaces. Use Restore in conjunction with ActiveEco Rejuvenator for regular cleaning to keep floors and tiles looking brand new. Read the label for full usage instructions.

ActiveEco Cleaning Pad

Restore may be applied with a mop, hand scourer or auto-scrubber. For optimum results combine Restore with the ActiveEco Cleaning Pad for results that will amaze you.

Reduce WHS Risks

Unlike many other deep restoration products ActiveEco Restore is not classed as a Dangerous Good making storage and use as safe and simple as possible.

ActiveEco

global cleaning solutions

The ActiveEco Range

ActiveEco is a range of powerful cleaners, purifiers and decontaminants designed for the world's most challenging applications. ActiveEco is designed for maximum power and effect in situations where regular products just don't work.

For a Better World

Whilst ActiveEco is designed with power in mind the range is also formulated to minimise health, safety and environmental risks - For a Better World.

Improving Lives

ActiveEco improves lives by reducing human and environmental exposure to toxic and dangerous chemicals.

Improving Business

ActiveEco is designed for cost efficiency enabling workers to get the job done fast and effectively.

Improving Innovation

ActiveEco's innovative formulations are designed to perform in situations where regular products aren't effective.
