# SKIMMER UNIK DESIGNED PERFECTLY. INTEGRATED EVENLY.

## FULLY INTEGRATED.

Skimmer Unik blends harmoniously into the surroundings of the pool thanks to its fully integrated top cover. Thanks to its lower height of water level from pool floor -5.5 cm- Skimmer Unik offers an infinite pool effect.

## QUIET OPERATION.

Skimmer Unik brings improved silent operation thanks to its exclusive curved floater solution.

## EASY MAINTENANCE.

Skimmer Unik eases the maintenance thanks to its larger basket capacity (3.5L)\* and its easy retrieval without touching the water.

\*Versus AstralPool traditional skimmer basket.

## NEW CONNECTION BOX

Fully integrated and easier to install and manipulate, see more detail in page 146.

# STYLE

A POOL FITTINGS RANGE IN STAINLESS STEEL

## MORE SOLUTIONS FOR A PERFECT FINISH

Round and square shapes with a contemporary design  
Better integration with pool basin

Thanks to the new design,  
possible imperfections  
and installation is covered

## EASY INSTALLATION

Solutions available for prefabricated and concrete pools with different lengths to make installer life easier

Compatible with all interchangeable accessories (plastic and stainless steel)  
Side smoothing for liner applications and easier to manipulate

## EASE OF MAINTENANCE

Easy to clean thanks to the new minimal design  
No visible screws in return inlets, avoiding possible corrosion

See pages 120, 140, 141

## Pool main drains information

# Pool main drains information

## EN 16713-02: 2016 - main drains

### RISK OF ENTRAPMENT

How to prevent it?

#### NEW POOL

##### ANTI-VORTEX COVER

Number of main drains per pool: **1**.

##### NON ANTI-VORTEX COVER

Number of main drains per pool: **2** balanced main drains, **distanced at minimum 1 meter**.

And if any of the **2 main drains** is **blocked**, the remaining **one should be able to absorb 100%** of the installation flow.

#### POOL RENOVATION

##### WITH MAIN DRAIN BODY CHANGE

Applies **new pool rules**.

##### UNCHANGED MAIN DRAIN BODY

Install an **anti-vortex grille** on pre-installed main drain.

#### CAVITY DIMENSION

Main drain should respect a certain cavity dimensions according to a mathematical rule.

#### OTHERS

Other requisites are considered to define that a main drain is compliant with EN, like design.  
e.g. the design of the grill to avoid human body parts or hair entrapment.

**Suction rate:** insure a maximum of 0.5 m/s paragraph 4.6.1

**Only with the fulfillment of all requisites of the standard,  
a Compliance Certification can be delivered!**

\*Anti-vortex plate is a special component installed in the suction line to control the turbulence in a flowing fluid. These plates allows to control the velocity of the fluid thus preventing cavitation in the fluid according to UNE-EN 13451-3.

## ABS MAIN DRAINS

**NORM main drains**

- All main drains in the range are supplied with UV protection.
- To prevent the risk of suction, install the main drains according to local regulations.
- Recommended use: Maximum suction rate of 0.5 m/s.

Also available in other colours

#### FOR LINER AND PREFABRICATED POOLS

Kit made up of a double gasket and the screws necessary for the installation of nozzles in panel pools. Made of TPE, the kit enables the installation of various accessories in pool shells and protects the panelling from coming into contact with water. Easy to install. Prevents corrosion of the panelling in the area that has been die cut.

We recommend to place this Kit on panel pools of metal sheet in nozzles 00330; 00332; 17382; 17383 and 56499.

### FOR LINER AND PREFABRICATED POOLS

Bushing, return inlet, suction nozzle, flange assembly to be installed in concrete, prefabricated and liner pools. The measurements of each item make it possible to interchange them with the stainless steel sets. The inlets can be installed in any bushing with a 1½" BSP thread. There is a flange set to install the inlets in pools with a liner. All items mainly made in plastic (ABS), except screws and gaskets. Each item can be assembled with the stainless steel sets. ### FOR LINER AND PREFABRICATED POOLS

Range of 300 mm long conduits for Ø 2" inlets and Multiflow that can be cut to different lengths, depending on the thickness of the pool wall. Made of ABS. The ribs of the end plates have holes for fitting the wall conduit to the pool structure, which makes assembly straightforward. The inlet's end plate ensures that it fits flush to the pool wall so that the liner remains flat against the wall and does not swell. This system is aesthetically pleasing as only the face plate can be seen.

### RISK OF ENTRAPMENT

#### How to prevent it?

ANTI-VORTEX COVER	NON ANTI-VORTEX COVER	WITH MAIN DRAIN BODY CHANGE	UNCHANGED MAIN DRAIN BODY
<p>Number of main drains per pool: <b>1</b></p> <p>According to paragraph 4.6.1b (1, 2 and 3)</p>	<p>Number of main drains per pool: <b>2</b> balanced main drains, <b>distanced at minimum 2 meters.</b> And if any of the <b>2 main drain</b> is blocked the remaining one <b>should be able to absorb 100%</b> of the installation flow. According to paragraph 4.6.1a (1, 2 and 3)</p>	<p>Applies <b>new pool rules</b></p>	<p>Install an <b>anti-vortex grille</b> on pre-installed main drain</p> <p>According to paragraph 4.6.1b (1, 2 and 3)</p> <p>or one or more additional main drain shall be installed as paragraph 4.6.1a (1, 2 and 3)</p>

Another possibility is to install a compensating tank.

### CAVITY DIMENSION

Main drain should respect a certain cavity dimensions according to a mathematical rule.

In addition to the main drain requirements a vacuum system may be provided.

### OTHERS

Other requisites are considered to define that a main drain is compliant with EN, like design.  
e.g. the design of the grill to avoid human body parts or hair entrapment.

**Only with the fulfillment of all requisites of the standard, a Compliance Certification can be delivered!**

\*Anti-vortex plate is a special component installed in the suction line to control the turbulence in a flowing fluid. These plates allows to control the velocity of the fluid thus preventing cavitation in the fluid according to UNE-EN 13451-3.

## CONCRETE POOL

## MAIN DRAINS

- All main drains in the range are supplied with UV protection.
- To prevent the risk of suction, install the main drains according to local regulations.
- Recommended use: Maximum suction rate of 0.5 m/s.
- Install at least 2 main drains, each with a suction capacity able to handle the pool's full flow rate.
